

FLAME-RESISTANT AND HEAT-RESISTANT
POLYCARBONATE COMPOSITIONS

ABSTRACT OF THE DISCLOSURE

Compositions containing:

- I. at least two components selected from the group comprising aromatic poly(ester) carbonates, graft polymers of one or more vinyl monomers on one or more graft bases having a glass transition temperature of $< 10^{\circ}\text{C}$, a thermoplastic vinyl (co)polymer, or poly(alkylene terephthalate) as well as
- II. 0.5 to 25 parts by weight of a mixture of phosphorus compounds of the general formula (I)

with the proviso that the composition contains at least 2 phosphorus compounds of the formula (I) in which X or one or more radicals R^1 , R^2 , R^3 and R^4 is/are different and wherein the sum of the parts by weight of the components is 100.
